## Gonzalez gags Jalosjos, other cons

## Order triggered by child rapist's claim he's a free man, not a prisoner

By Leslie H. Zimmerman and Robert M. Swartz

**DISCUSSION:** The institution chose the release of recorded DNA expert testimony. Although the latter's threat to sue guaranteed compliance, media interviews with all witnesses and attorneys will now have to be cleared with Justice Secretary's legal assistance.

It is a pleasure to announce that the 1998-1999 season of the *Journal of the American Statistical Association* will be published in 1999.

These studies are being challenged, though, by a new wave of research in Sweden.

For further insight into the role of the *hsp70* gene in the response to heat shock, we have used transgenic *Drosophila* lines that express the *hsp70* gene under the control of the *hsp70* promoter. These lines have been used to study the effects of heat shock on the expression of the *hsp70* gene and on the development of the fly.

# PHILIPPINE MEDICAL ASSOCIATION and PHILIPPINE DENTAL ASSOCIATION

## Position Paper on Cheap Medicine Bills in Senate and Congress

The primary objective of Senate Bill No. 1818 and House Bill 2644 is to ensure availability of medicines at low or affordable cost.

We, the Philippine Medical Association (PMA) and the Philippine Dental Association (PDA), fully endorse measures to reduce medicine prices. We strongly support Senate Bill No. 1818 and House Bill No. 2644 in so far as amending the Intellectual Property Code RA 8293 is concerned. We, however, object to the provision of Sec. 29 of HB 2644 (amending Section 4 of RA 8293 otherwise known as the Genocide Act of 1966). This amendment removes the physicians' and dentists' perspective and discretion to include the brand name of drugs in their prescriptions.

The PMA and PDA believe that a necessary commitment in delivering an adequate health care system is the fiduciary doctor-patient relationship. Guided by the Hippocratic Oath, physicians and dentists utilize all their technical knowledge, skills, and expertise to give the best to their patients. They are likewise accountable for all their professional acts to their patients, peers, medical organizations, and to the State. Only physicians and dentists are entrusted by the State to perform this necessary task and responsibility.

The proposed amendment to the Genocide Act relegates the physicians' and dentists' task and responsibility to the drugstore categories. This puts the patients' and general public's health at a great risk, unconscionably.

Drugs of the same generic name may differ in terms of therapeutic efficacy and safety. Only the physician and dentist, after having the experience and the expertise to recognize the clinical response of various treatment, brands, or unacceptable manifestations of drugs and drug interactions, have the competence to recognize the signs or side effect pattern.

The government fears that weakening the regulatory role of the Bureau of Food and Drugs (BFD) to ensure strict compliance with WHO standards of safety, efficacy, and quality of pharmaceutical products. This is a prevarication in the name of the Cheap Medicine Bill. BFD must be provided enough resources to ensure that its operations meet the world international standards.

Available data shows that not all drugstores are insured by or are under the licensed pharmacists' direct operational supervision and control. Delegating the power of discretion on drug selection to the salesperson with no or limited knowledge of drugs and their interactions, purity and extent of adulteration to public health and safety, may contribute on the part of BFD in particular its inability to regulate and regulate activities, while transferring discretion on drug selection from the physician and dentist to the drugstore salesperson could spell disaster to the safety of Filipino consumers. Public safety is, and should be, non-negotiable.

Only physicians and dentists are academically trained, morally, and ethically fit to ensure or deliver the best medical, dental, while we, the Philippine Medical Association and Philippine Dental Association, support the two proposed legislative measures to lower the prices of medicine, we oppose its transfer from the Amendment of Section 4 of the Genocide Act. The amendment is a great disservice to the Filipino people.

# PAF officer shoots aide over drinks in Basilan

By Tarra Quismundo

A PHILIPPINE AIR FORCE OFFICER SENT to Mindanao to lead the PAF's humanitarian efforts in Basilan is under military custody after he fatally shot his right-hand man.

Lt. Col. Arturo Apud, 54, is confined to quarters at the 3rd Air Division in Zamboanga City for the shooting of his assistant, Capt. Jesus Fernandez, 44, on Saturday.

"Unfortunately, they had a misunderstanding, they had an exchange. These things are not supposed to happen but it's unfortunate," said PAF chief Lt. Gen. Horacio Tolentino, who was reached by phone while visiting airmen in Palawan yesterday.

Lt. Col. Epifanio Panzo Jr., Air Force spokesperson, said Apud headed the PAF engineering brigade based at the 355th Aviation Engineering Wing in Pampanga that was sent to Basilan to undertake public works projects as part of the government's humanitarian efforts alongside the continuing combat operations in the South.

Citing an initial field report, Panzo said Apud and Fernandez had a heated argument while having drinks in their barracks in Sumisip, Basilan, at around 9:30 p.m. on Dec. 15.

"They dared each other... they both drew their guns, but Fernandez was beaten to the draw," Panzo said.

Fernandez suffered bullet wounds in the body from Apud's M-16 rifle. His remains will be airlifted to Manila on a C-130, Panzo said.

"We'll have to investigate further to determine what really happened. [Apud's liability] will depend on the circumstances," Tolentino said.

He said Apud may be transferred to the Villamor Air Base stockade in Pasay City while the shooting is being investigated.

Despite the incident, the PAF's engineering projects in Basilan will continue as planned, Tolentino said.

## Carolino, former Army officer; 80

COL. JEREMIAS "JIMMY" CAROLINO, FORMER director of Century Bank and the Philippine National Bank remittance center in the United States, died on Sept. 30 in Glendale, California, at the age of 80, his family has announced.

Carolino, of Paete, Laguna, graduated from the Philippine Military Academy in 1951 and was a member of the Corps of Engineers of the Philippine Army.

His widow Adoracion said a memorial service was held for Carolino at the Burbank First United Methodist Church followed by the rendering of military honors by members of the Philippine Military Academy Association, Southern California chapter, headed by Cavalier Pete Cruz.

The flag that draped Carolino's casket was handed to his widow by Commodore Ramon Alcaraz.

Carolino is also survived by his sons Armand, Arnel, Arthur and Arcelino; daughters in law Beth Bailon, Linda San Miguel, Tina Briones and Annabelle Canos, and grandchildren Mark, Allan, Cristina, Adriel, Agean, Byron, Jeremy and Angeleah.

He served in the Korean War in 1952-54. Later, he worked on the construction of the Manila North Diversion Road (now the Northern Luzon Expressway). In 1972, then President Ferdinand Marcos appointed him general manager of the Food Terminal Inc. At the same time, he was appointed to the Asian Center for Development Administration, a United Nations agency based in Malaysia.

# Jobless rate down in '07, says survey

By Michelle V. Remo

THE JOBLESS RATE DROPPED TO 6.3 PERCENT of the labor force in October from 7.3 percent in the same month last year, in what the government said was a natural consequence of a robustly growing economy.

Based on the Labor Force Survey released yesterday by the National Statistics Office, there were some 2,261,700 unemployed persons in October out of a total labor force of 35.9 million, or 6.3 percent of all workers.

Conversely, the number of employed persons was 33,638,300 for an employment rate of 93.7 percent.

Myrna Asuncion, head of the National Economic and Development Authority policy and planning department, said the drop in the unemployment rate meant there was an increase in the number of people generating income. This supported the earlier report on the growth of the Philippine economy that beat most forecasts, she said.

## Economic indicator

"More people are now earning income. This is a reflection of the economy's performance," Asuncion said in an interview.

The economy, as measured by the gross domestic product (GDP), grew by 7.1 percent year-on-year in the first three quarters of 2007. This has kept the economy on track to surpass the official growth target rate of between 6.1 and 6.7 percent for the entire year.

The GDP, the most common yardstick of a country's economic performance, is the sum of all goods produced and services rendered within an economy during a period.

The NSO said nearly half, or 48.8 percent, of all employed persons in October belonged to the services sector. The sector, which recorded the fastest growth among key sectors of the economy so far this year, includes the booming business process outsourcing (BPO) industry which counts call centers.

The latest data showed the services sector, boosted by the income generated by the BPO industry, grew 8.2 percent year-on-year from January to September this year, up greatly from the 6.1 percent recorded in the same period last year.

## Agri sector

The agriculture, fisheries and forestry sector grew by 4.6 percent from January to September, while the industry sector (which includes manufacturing and mining) grew by 6.8 percent.

The NSO said that of the employed persons in October, 35.1 percent were part-time workers while the larger 64.9 percent share were full time workers. Full time workers are those who work at least 40 hours a week.

Employed persons looking for additional work are considered underemployed, according to the NSO. In October, the agency said, 18.1 percent of the labor force were underemployed.

Asuncion said the government had generated about 800,000 new jobs so far this year, still short of the target of 1 million jobs annually.

She said the government would work on meeting the million jobs a year target in 2008.

The government expects the economy to grow between 6.3 and 7 percent next year.

Asuncion said the government hopes this would translate to 1 million new jobs next year.

She said that if the growth would be in labor-intensive sectors, such as construction and manufacturing, the target of 1 million new jobs would be attainable.

## How to avoid a populist demagogue

Commentary

By William Williamson

As the 2016 election draws near, the political landscape is becoming increasingly polarized. The rise of populist demagogues has become a global phenomenon, with leaders like Donald Trump in the United States and Narendra Modi in India leading the charge. These leaders often appeal to the fears and desires of the masses, promising quick solutions to complex problems. However, their rhetoric is often based on fear and misinformation, and their policies can be detrimental to the long-term well-being of their countries. It is crucial for citizens to remain vigilant and informed, and to hold their leaders accountable for their actions.

The rise of populist demagogues is a result of several factors, including economic inequality, globalization, and the erosion of traditional values. These leaders often exploit these issues to gain power, promising to restore a sense of order and national pride. However, their policies often lead to increased inequality and the erosion of democratic institutions. It is important for citizens to understand the root causes of these issues and to work towards a more equitable and democratic society.

## Keep at eye on your daughters

By William Williamson

In a world where technology is constantly evolving, it is crucial for parents to stay informed about the latest trends and risks. When it comes to your daughters, this is especially true. The internet is a double-edged sword, offering endless opportunities for learning and growth, but also posing significant risks to their safety and well-being. Parents must take an active role in monitoring their daughters' online activities, ensuring they are using the internet responsibly and safely. This includes setting boundaries, educating them about potential dangers, and being open to communication.

The challenges faced by parents in the digital age are numerous. From cyberbullying to identity theft, the risks are real and can have long-lasting effects on a child's life. Parents must be proactive in addressing these issues, providing their daughters with the tools and knowledge they need to navigate the digital world safely. This involves staying up-to-date on the latest technology and security threats, and being a role model for responsible digital citizenship.

## Foundation of a long relationship

By William Williamson

Building a strong foundation for a long-lasting relationship is a process that requires time, effort, and communication. Whether it's a romantic partnership or a professional collaboration, the key is to establish clear expectations and boundaries from the beginning. Open and honest communication is essential, allowing both parties to express their needs and concerns. Trust is another crucial element, as it forms the basis of any successful relationship. By being consistent and reliable, you can build a strong foundation that will withstand the challenges of time.

The foundation of a long relationship is not built overnight. It is the result of many small, consistent actions over time. Communication is the cornerstone of any relationship, and it's important to listen as much as you speak. Understanding each other's perspectives and needs is key to resolving conflicts and maintaining harmony. A strong foundation also involves mutual respect and support, allowing both parties to grow and thrive together. By focusing on these elements, you can create a relationship that is both fulfilling and enduring.

## 'Still an awesome landscape in Ifugao'

**By [Name]**  
**PHOTOGRAPHS BY [Name]**

**A**fter 11 years, the Ifugao Rice Terraces, a UNESCO World Heritage Site, still look as beautiful as ever. The terraces, which are a masterpiece of ancient engineering, are still in use and are still a source of pride for the Ifugao people.

The terraces are a series of terraced fields that are built into the steep slopes of the mountains. They are built using a system of stone walls and wooden posts that are driven into the ground. The terraces are built in a way that allows water to flow from the top of the mountain down to the bottom, where it is used to grow rice.

The Ifugao people have lived in the area for centuries and have developed a unique culture. They are known for their rice terraces, which are a source of pride and a source of food. They also have a rich history and a strong sense of community.

The terraces are a beautiful sight to see and are a testament to the skill and ingenuity of the Ifugao people. They are a source of pride and a source of food, and they are a beautiful sight to see.

### Everlasting to nurture old Baguio charm

# GMA 7 says it's 'equally interested' in AGB Nielsen case

By Standard/Leader Bureau

MANILA, July 21 (AP) — GMA 7 said it is "equally interested" in the AGB Nielsen case, a move that could lead to a trial by jury for the network's former president.

The network's former president, who was charged with the murder of a former GMA 7 employee, said he was "equally interested" in the case. He said he was "equally interested" in the case, and he was "equally interested" in the case.

# La Salle-Ateneo golf duel fires off today

La Salle and Ateneo de Manila are set to face each other in a golf duel today at the La Salle Golf Course. The two schools have a long history of rivalry in this sport, and this year's match is expected to be particularly competitive. The La Salle team, coached by [Name], is looking to build on their success from last year, while the Ateneo team, led by [Name], aims to reclaim the title. The match will start at 8:00 AM and will consist of several rounds of play. Fans are encouraged to attend and cheer for their favorite team.

La Salle and Ateneo golfers in action during a recent match.

The La Salle team is currently in excellent form, having won several recent matches. Their key players include [Name] and [Name], both of whom are experienced and skilled. The Ateneo team, on the other hand, has a more balanced lineup with several young players who are looking to make a name for themselves. The match is expected to be a closely fought affair, with both teams having a chance to win. The winner of the match will earn valuable points towards the overall championship.

# Cavs gun down Bucks on James' milestone

The Cleveland Cavaliers defeated the Milwaukee Bucks in a thrilling game last night, securing a victory on LeBron James' milestone night. James, who is nearing a significant career milestone, led the Cavaliers with a stellar performance, scoring [Points] points. The game was a high-scoring affair, with both teams putting up impressive numbers. The Cavaliers' defense was particularly strong in the fourth quarter, holding the Bucks to a low score and sealing the win. The victory is a major boost for the Cavaliers' playoff hopes.

LeBron James celebrates after a successful play during the game against the Bucks.

# Dimakuling shares third round lead

Dimakuling has taken the lead in the third round of the [Tournament Name] golf tournament. The player, who has been in excellent form throughout the event, finished the round with a score of [Score]. This performance has put him in a strong position to win the tournament. The competition is fierce, with several other top players also in contention. The final round is expected to be a dramatic one, with many fans watching closely to see who will emerge as the champion.

Figure 1 is a 3D bar chart illustrating the distribution of the number of children per woman (Y-axis, 0 to 5) across different levels of education (X-axis: Primary, Secondary, Tertiary) and income (Z-axis: Low, Medium, High). The chart shows that higher education and income levels are associated with a higher proportion of women having 1 or 2 children, while lower education and income levels are associated with a higher proportion of women having 3 or more children.

# MOTORING

Let's Take It To The Road

## 10 things to consider

by David Green

1. **W**hen you're in the market for a new car, you'll want to consider a number of factors. First, you'll want to think about the car's performance. You'll want to make sure the car has enough power to get you where you're going. You'll also want to make sure the car has good handling and braking. Next, you'll want to think about the car's safety. You'll want to make sure the car has good crash test ratings. You'll also want to make sure the car has good safety features, like air bags and ABS. Then, you'll want to think about the car's fuel economy. You'll want to make sure the car has good gas mileage. Finally, you'll want to think about the car's price. You'll want to make sure the car is within your budget.

University of  
Texas at Austin

Figure 1 illustrates the experimental design, showing a sequence of events: Stimulus, Response, Feedback, and Outcome, connected by arrows, with a feedback loop from Outcome back to Stimulus.

1

Figure 1 is a line graph illustrating the percentage of the total sample for various age groups over time. The Y-axis represents the percentage of the total sample, ranging from 0 to 100. The X-axis represents the year, from 1980 to 2100 in 5-year increments. The age groups are: 0-14, 15-24, 25-34, 35-44, 45-54, 55-64, 65-74, and 75+. The graph shows a significant shift in the population structure over time, with the youngest age group (0-14) decreasing from about 25% in 1980 to near 0% by 2050, and the oldest age group (75+) increasing from about 5% in 1980 to about 25% by 2050. The middle age groups (25-34, 35-44, 45-54, 55-64, 65-74) show a general increase in percentage over time, peaking around 2050 before declining.

1. The first step is to identify the problem.
 2. The second step is to define the problem.
 3. The third step is to analyze the problem.
 4. The fourth step is to develop a solution.
 5. The fifth step is to implement the solution.
 6. The sixth step is to evaluate the solution.
 7. The seventh step is to monitor the solution.
 8. The eighth step is to maintain the solution.
 9. The ninth step is to improve the solution.
 10. The tenth step is to document the solution.
